AMENDMENTS TO THE CLAIMS:

This listing of the claims will replace all prior versions, and listings, of the claims in this application.

Listing of Claims:

1. (Currently amended)   A method comprising:

examining by an application stored on an Internet terminal, ~~which standards~~ an Internet page opened on a display screen of the terminal to determine at least one standard that the Internet page supports,

responsive to the examining, determining that a standard according to a wallet program of the terminal is among the at least one ~~of the~~ supported standard ~~standards~~ and if the wallet program is ~~a~~ among the at least one supported standard, automatically displaying a wallet icon on the display screen of the terminal for indicating to a user that the user can use the wallet program, and

starting the wallet program from said displayed wallet icon.

2. (Currently amended)   A method according to claim 1 wherein said wallet program is a wallet program complying with the ECML (Electronic Commerce Modeling Language) standard and the at least one standard is the ECML standard.

3. (Currently amended)   A method according to claim 1 wherein the wallet program is started for transferring account transaction information from a buyer to the ~~a vender's~~ Internet page which comprises a vendor's Internet page.

4. (Currently amended)   A terminal comprising:

a display screen;

an Internet browser program;

a wallet program for storing information in electronic form on the terminal and for transferring information from the terminal to an Internet page opened on the display screen of the terminal,

wherein the terminal further includes an application <u>configured to examine</u> ~~for examining which standards are supported by~~ an Internet page opened on the display screen of the terminal <u>to thereby determine at least one standard that the Internet page supports</u> and, responsive to <u>determining that</u> the <u>at least one</u> supported <u>standard includes</u> ~~standards including~~ a standard supported by the wallet program, ~~indicating~~ <u>to indicate</u> to a user that the user can use the wallet program by <u>automatically</u> displaying a wallet icon on the display screen of the terminal and further enabling the user to open the wallet program by pressing the displayed wallet icon.

5. (Currently amended)   A terminal according to claim 4 wherein said wallet program is a wallet program complying with the ECML (Electronic Commerce Modeling Language) standard <u>and the at least one standard is the ECML standard</u>.

6. (Previously Presented) A terminal according to claim 4 wherein said terminal is a wireless terminal.

7. (Previously Presented) A terminal according to claim 4 wherein said application is part of Internet browser software of the terminal.

8. (Currently amended)   A memory storing an ~~An~~ application at an Internet terminal comprising an Internet browser program and wallet program for storing information in electronic form on the <u>Internet</u> terminal and for transferring information from the terminal to an Internet page opened on the display screen of the terminal, said application <u>configured to examine</u> ~~comprising~~

~~means for examining which standards~~ an Internet page opened on the display screen of the terminal <u>to determine at least one standard that the Internet page</u> supports,

~~means for~~ <u>to determine</u> ~~determining~~ if a wallet program standard is <u>among the at least one supported standard</u> ~~one of the supported standards~~, and

~~means for~~ <u>to automatically indicate</u> ~~indicating~~ to a user, responsive to ~~the means for~~ determining that the wallet program is <u>among the at least one</u> ~~a~~ supported standard, that the user can use the wallet program with the Internet page by displaying a wallet icon on the display screen of the terminal and further <u>to enable</u> ~~for enabling~~ the user to open the wallet program by pressing the displayed wallet icon.

9. (Currently amended)   A memory ~~An application~~ according to claim 8, wherein said wallet program is a wallet program complying with the ECML (Electronic Commerce Modeling Language) standard <u>and the at least one standard is the ECML standard</u>.

10. (Currently amended)   A memory ~~An application~~ according to claim 8 further <u>configured for</u> ~~comprising means for~~ enabling and disabling the application.

11. (Previously Presented)   A memory ~~An application~~ according to claim 8 comprising a part of Internet browser software of the terminal.

12. (Previously Presented) A terminal according to claim 4 wherein said terminal is comprised of a mobile phone.

13. (Currently amended) A memory ~~An application~~ according to claim 8 wherein said terminal is comprised of a wireless terminal.

14. (Currently amended) A memory ~~An application~~ according to claim 8 wherein said terminal is comprised of a mobile phone.
